Reference Letter: Pippa Rogers- Workspace Design

Workspace design was commissioned to renovate the new premises bought for our expanding team at Columinate. The renovation required out of the box thinking to ensure we created enough space and still created a pleasant working environment for our employees. Workspace design did not disappoint.

Their proposed layout was well thought-out and they paid specific attention to detail, things we never thought about. They managed our project from beginning to end and all within the proposed time-frame, which was quick and efficient.

Pippa herself was very hands-on and easy to approach and overall we were very satisfied with the final outcome. I would highly recommend Workspace design and have since called on their expertise again for our further expansions.

Regards,
Elna Smit
Marketing director
